

K-LOVE is a radio station that broadcasts nation wide through the use of FM translators. It is beneficial to me to be able to access the K-LOVE station throughout the country. I know that when I travel I will still have access to the station that I enjoy listening to. I am a Christian and it is extremely important to me that I be able to control the type of media that is brought into my home and my car. I want to be able to have children with me and not have to worry about what they might hear on the radio. I would be upset to find out that my radio station using the FM translator was taken off the air because a new (non-family friendly) radio station wanted to use the LPFM technology. Not every community has a local Christian station, especially one that plays almost all music with no advertising. I would hate to see that taken away from so many who enjoy the station, which only exists to the extent it does through the use of the FM translators.
